

An elegant and contemporary fresh milk coffee machine that has been developed with attention to detail and with the best material finishes, providing it with a unique premium identity. Vitro X1 MIA is also very easy to use and maintain and delivers consumers a consistent high standard coffee experience. You will be able to offer a wide range of espresso based fresh milk drinks, thanks to the innovative patented micro-injected air technology (MIA), from velvety cappuccinos to latte macchiatos with a deliciously thick layer of foam to satisfy the tastes of the most demanding consumers. The independent hot water serving areas allows the consumer to prepare tea & delicate infusions at ease with clean fresh hot water.

Delivery should be 4-6 weeks from
point of order.

fast, safe and extremely user friendly automatic process that ensures perfect cleaning of the fresh milk system. After each service and five minutes after the last dispense, the Vitro X1 MIA automatically releases water under pressure through all the pipes to remove any traces of milk that may have been deposited inside. A manual cleaning process with a cleaning product is scheduled every 24-48 hours and is carried out in a safe and very simple way. The cycle lasts 10 minutes and it takes just 1 minute to activate the process.

Complete package available. Bespoke housing unit available. Our complete package includes everything you need to be up and running, includes sample beans, water system, waste system. All you need is a power supply.
